Mobilize The Biggest Displays

Heckler XL Display Stand MkII
H1053

Heckler

Heckler XL Display Stand MkII is the rock-solid rolling stand built to mobilize today's largest commercial displays with absolute confidence. Designed for extra-large digital signage, touchscreens, and all-in-one video collaboration displays, MkII builds on our proven XL platform with structural upgrades and refined aesthetics throughout.

A new patent-pending Heckler Connection System with set-screw locking, larger rectangular steel box-beam legs and columns, and a one-piece structural beam combine to create a noticeably stiffer, more rigid stand that feels planted and secure—even with the biggest, heaviest displays. Oversized five-inch total-lock casters roll smoothly when you need to move and lock firmly when it's time to present.

With wide VESA compatibility, optimized eye-line display height, compact nested storage, fast display mounting, and clean cable management, Heckler XL Display Stand MkII is the single rolling stand your organization can standardize on for conference rooms, training spaces, events, and shared AV deployments.

Heckler

Features

Patent-pending Heckler Connection System with set-screw connections create an exceptionally stiff, stable structure.

Rectangular legs and columns deliver added strength and confidence for XL displays.

A solid beam design maximizes rigidity.

Designed for 85-inch to 98-inch 16:9 displays as well as 85-inch to 105-inch 21:9 displays up to 220 pounds.

Supports mounting patterns from VESA 400 to VESA 1600.

Positions displays, with height dimensions up to 44 inches, up to 42 inches above the finished floor, enabling video bars to be mounted below the display at a comfortable, natural viewing height.

Five-inch twin-wheel casters roll easily and lock completely in place.

Heckler

Features

Multiple stands stack tightly to save valuable floor space.

Mount displays, tool-free, in about two minutes with our included, patent-pending Heckler Display Mounting System.

Integrated cord wraps and routing keep installations tidy.

Compact packaging enables efficient shipping via common carriers.

TAA-compliant. Made in Phoenix, Arizona.

ADA-compliant.
