Universal Video Bar Mounting

Heckler VESA Mount for Video Bars
H597

***Display and Video Bar are not included.**

Heckler

Specify once, upgrade forever. The Heckler VESA Mount for Video Bars eliminates the hidden cost of proprietary video bar mounts that force full-room retrofits at every refresh. By replacing brand-specific mounting accessories with a universal, non-proprietary standard, AV managers can swap video bars in minutes—without removing displays, changing wall mounts, or deploying two-person crews. The result is freedom from vendor lock-in, dramatically reduced labor, predictable upgrade cycles, and long-term budget protection across enterprise deployments.

Features

Universal compatibility with most video bar wall-mounting brackets.

Supports 43–75 inch displays with VESA 200, 300, or 400 patterns.

VESA 350 holes specifically for repurposing EOL Surface Hub 2S 50" devices with video bars.

Heavy-gauge steel mount supports large, heavy video bars.

Low-profile, wall-hugging placement supports ADA compliance.

Thick aluminum VESA plate for strength and rigidity.

Included spacers ensure displays mount plumb and aligned.

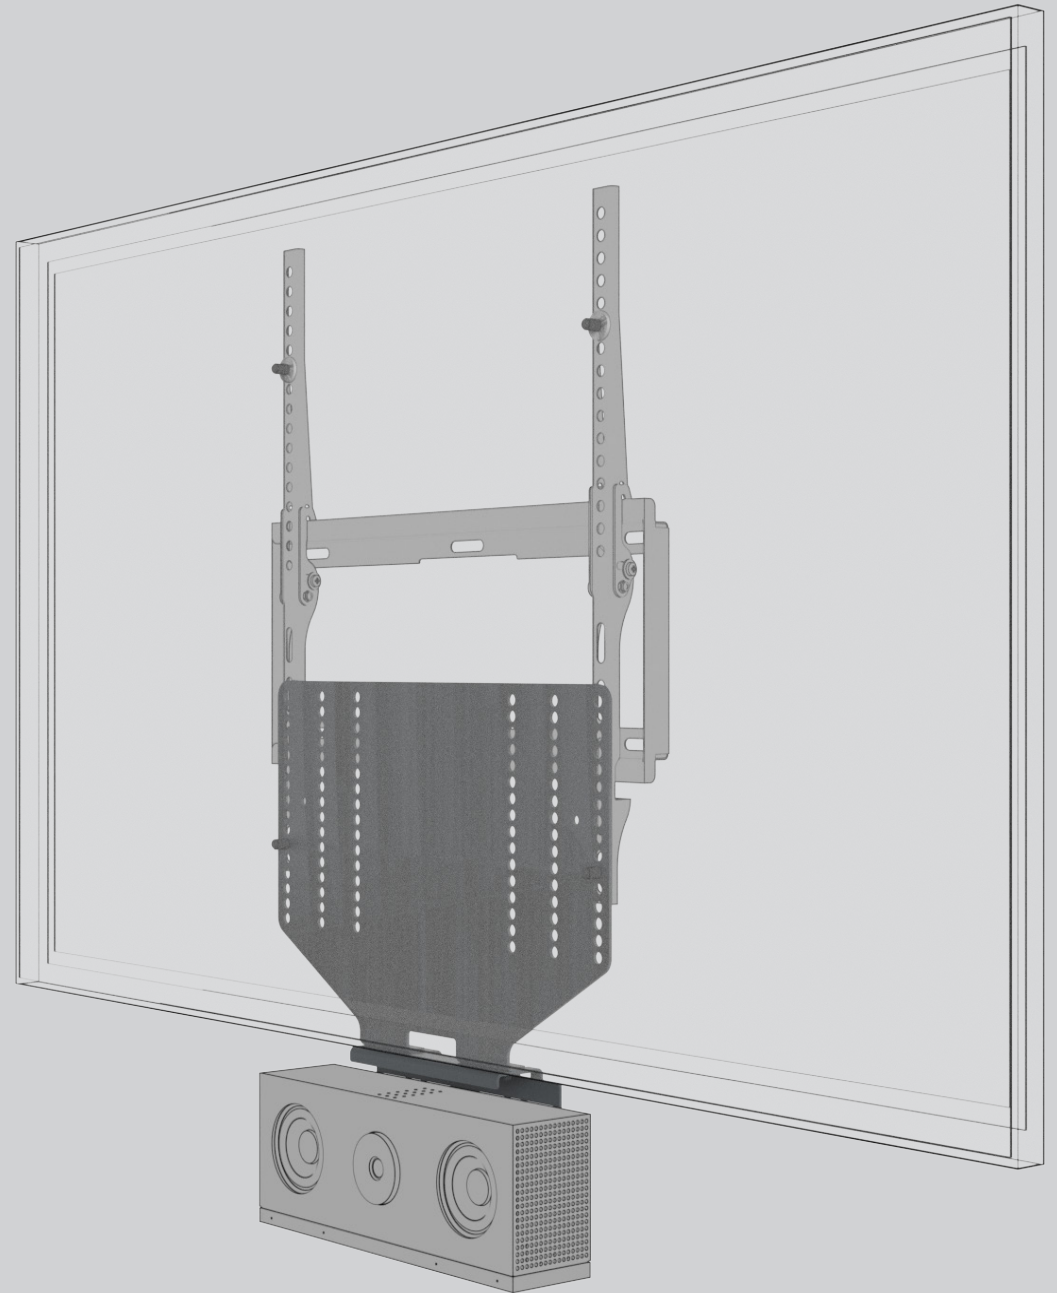

Durable powdercoat finish for commercial environments.

TAA compliant. Made in Phoenix.

Non-proprietary standard that eliminates vendor lock-in.

Over 1 inch of forward/backward depth adjustability.
