Heckler

Heckler Lectern completely reimagines the traditional lectern to provide a significantly improved experience for instructors, AV teams, and learners. With universal accessibility, technology future-proofing, and aesthetics designed into its DNA, everyone in your organization will find something to enjoy.

Features

Sit/Stand motorized desktop height adjusts from 30 inches to 50 inches.

Large desktop gives instructors room for their computers, documents, keyboard, mouse, and more.

Fully accessible, ADA-compliant, and provides an identical experience for standing and seated instructors.

Future-proof console area includes:

Three console insert areas for embedding mic chargers, courtesy cables and outlets, control panels, and more.

Four mounting holes for display arms, document camera, lights, and other AV gear.

Heckler

Features

Three stacks of 2RU component racking concealed inside the desktop.

Innovative component layout makes integration a breeze by positioning components directly next to displays, control screens, and courtesy outlets.

Easy-lift desktop offers quick and secure access to components and other gear.

Interior floor features grid for easy wire management, gear mounting, and passive airflow.

Full aluminum and steel construction for strength, durability, and recyclability.

Heckler

Features

Obscured rear surface features four pass-through cable grommets and mounting locations for three 80mm exhaust fans.

Side and rear walls feature mounting locations for modesty panels. Modesty panels are sold separately to enable last-mile installation, and a wide variety of customization.
