Heckler

Heckler Lectern revolutionizes the conventional lectern, dramatically enhancing the experience for instructors, audio-visual professionals, and students alike. Designed with universal accessibility at its core, it ensures effortless use for everyone. Its future-proof technology integration anticipates evolving digital needs, ensuring long-term relevance and efficiency. Moreover, its aesthetically pleasing design is crafted to appeal to all members of your organization, blending form and function seamlessly. Discover a lectern that not only meets but exceeds the expectations of every user, making it a valuable addition to any educational or professional setting.

Features

Sit/Stand motorized desktop height adjusts from 30 inches to 50 inches.

Large desktop gives instructors room for their computers, documents, keyboard, mouse, and more.

Fully accessible, ADA-compliant, and provides an identical experience for standing and seated instructors.

Future-proof console area includes:

Two console insert areas for embedding mic chargers, courtesy cables and outlets, control panels, and more.

Two mounting holes for display arms, document camera, lights, and other AV gear.

Heckler

Features

Two stacks of 2RU component racking concealed inside the desktop.

Innovative component layout makes integration a breeze by positioning components directly next to displays, control screens, and courtesy outlets.

Easy-lift desktop offers quick and secure access to components and other gear.

Interior floor features grid for easy wire management, gear mounting, and passive airflow.

Full aluminum and steel construction for strength, durability, and recyclability.

Heckler

Features

Obscured rear surface features two pass-through cable grommets and mounting locations for two 80mm exhaust fans.

Side and rear walls feature mounting locations for modesty panels. Modesty panels are sold separately to enable last-mile installation, and a wide variety of customization.
